

Winding machine VEN-WB

- Load carrying capacities : 8—15—25—40 tons
- Drum dimensions in consultation client
- Compact electrical driven hydro unit (400V)
- 2 directions : winding/unwinding
- Stepless speed control of the drum
- Hydromotor constructed on a compact inline reduction gearbox
- Drum shaft with hydraulically controlled slide coupling
- Remote control
- CE- marking

Options :

Various drum shafts, possibility to pick up by a forklift truck on one side, mechanical brake mounted on the drum shaft to enable braking and cause a certain tension during winding off

Hydraulically controlled coupling and mechanical brake (option)
